## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Tomlinson 3,698,551.

Tomlinson discloses a fluid dispenser assembly as seen in Figure 7, which comprises a fluid dispenser (53), a wrapper (54) encasing the dispenser at least in part, the wrapper defining at least one application zone for coming into contact with the dispenser (col. 4, ll. 58-67 onto col. 5, ll. 1-44), the dispenser assembly being characterized in that the dispenser comprises a body (58) forming at least one substantially cylindrical segment, the segment defining an affixing zone for coming into contact with the application zone of the wrapper as seen in Figure 7. The device shown by Tomlinson will perform the method recited in claims 16-17 during normal operational use of the device.

### **Conclusion**

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Feinberg et al. 6,915,901, Kuo 6,637,964, Kikuchi 5,454,209, Gutt 5,257,704, Slavicek 4,631,897 and Wysocki 4,261,462 disclose other types of dispenser.
